SPOŠTOVANJE NARAVE | RESPECT NATURE

Pitna voda / *Tap water*

Slovenija je ena redkih držav, ki se lahko pohvali z zelo kvalitetno pitno vodo brez predhodne obdelave. Voda iz pipe je brezplačna in brez odpadne embalaže.

Z vodo ravnajmo odgovorno.

Slovenia is one of the rare countries where exceptionally high-quality drinking water flows straight from the tap.

Tap water is free, pure, and comes without unnecessary packaging waste.

Let's value and protect this precious resource responsibly.

Ločevanje odpadkov / *Waste separation*

Hvala, ker odpadke odlagate izključno v ustrezne zabojnike.

Odpadki v naravi onesnažujejo podtalnico in druge vire pitne vode.

Thank you for helping us protect the environment by separating waste responsibly.

Waste left in nature can pollute groundwater and precious drinking water sources.
