

# SPA MAJER | PRICE LIST 2026

## SUGARING

A gentle, natural method of hair removal that respects the skin and its natural balance. At SPA MAJER, we perform hair removal using sugar paste – either by hand (sugaring) or using the traditional strip method – always according to the hair type, skin sensitivity and desired result.

With the hand sugaring technique, hair is removed in the direction of its natural growth, making the treatment more comfortable, minimising skin irritation and significantly reducing the risk of ingrown hairs. After the treatment, the skin feels silky smooth, soft and soothed.

With regular treatments, hair gradually becomes finer and sparser, while the intervals between appointments naturally become longer. The result is a long-lasting feeling of beautifully cared-for, healthy and impeccably smooth skin.
